Help with EU REACH, EU RoHS, CA Prop 65 and other regulations

When you need to comply with global product compliance regulations, GreenSoft is here for you. GreenSoft helps manufactures collect, manage and report on compliance data for their products and components.

We offer comprehensive **Data Services** and the award-winning **GreenData Manager®** software. Customizable packages are flexible for companies of all sizes.

We Cover The Following Global Environmental Regulations:

- ⊘ EU RoHS
- ⊘ EU REACH SVHC
- ⊘ EU REACH Annex 14, Annex 17
- ⊘ California Prop 65
- ⊘ Conflict Minerals
- ⊘ China RoHS
- ⊘ CanLII SOR/2012-285
- ⊘ California RoHS
- ⊘ Battery Directive
- ⊘ Packaging Directive
- ⊘ Ozone Depletion Substances Directive
- ⊘ Asbestos Directive
- ⊘ Radioactive Substance Directive
- ⊘ Halogen Free
- ⊘ Norwegian POHS
- ⊘ PFOS
- ⊘ Custom rules and more

The GreenSoft Advantage

GreenSoft Technology, Inc. is a leading provider of environmental compliance data management services and software for the global electronics industry. For over 15 years we've been helping manufacturers around the globe manage their compliance data for chemical regulations and directives.

GreenSoft has a broad range of expertise in active and passive components, electrical and mechanical parts, packing and printing materials, and raw materials including gas and chemicals. GreenSoft has relationships with over 34,000 suppliers worldwide and is ISO 9001:2015 certified.

Customers

3M | AllOt communications | ABB | Abbott

BARCO | Boston Scientific | Hillrom | Jabra

Kulicke & Soffa | Elbit Systems | GE Oil & Gas | HOLOGIC

Logitech | LifeSize A division of Logitech | Mellanox TECHNOLOGIES | MSA The Safety Company

napatech | Newtec | natus | Starbucks Coffee

Schneider Electric | Siklu | THALES | Telit wireless solutions

SMART Modular Technologies | Silicom Connectivity Solutions | TEXAS INSTRUMENTS | TELULAR

TDK TDK-Lambda | ThermoFisher SCIENTIFIC | Server Technology Quality Rack Power Solutions | VERIS INDUSTRIES

United Technologies | VERINT | Visonic For a secure way of life | VAISALA

Data Services and Software for Environmental Compliance Data Management

Helping electrical and electronic equipment manufacturers comply with global regulations such as EU REACH, EU RoHS, CA Prop 65, Conflict Minerals and more!

Data Services: Compliance starts with Full Material Declaration (FMD) data

Manufacturers have many responsibilities under environmental product regulations, and the experts at GreenSoft are ready to do the heavy-lifting for you. We will:

- ⊘ Collect FMD data on all your affected products and components from suppliers
- ⊘ Verify that information for accuracy and completeness
- ⊘ Keep that information up-to-date, stored and logged in GreenData Manager software
- ⊘ Generate compliance reports on the product-level and company-level
- ⊘ Stay informed on changes and new restricted substances added to regulations over time

Doing these tasks yourself is laborious and time-consuming as suppliers frequently fail to respond or provide incomplete or incorrect information, requiring repeated contact and follow-up. Restricted substances lists can also be difficult to keep up with, such as the SVHC list under EU REACH which has new additions every six months.

GreenSoft will utilize our experience, existing connections with suppliers, and our extensive GreenSoft Components Database to significantly shorten the collection and validation time for your parts data. Your dedicated Project Manager will make sure you're always up-to-date on the ever-changing regulation requirements.

The New Standard for Conflict Minerals Compliance: Smelter or Refiner (SOR) Validation

Conflict Minerals legislation requires affected companies to show due diligence and perform Reasonable Country of Origin Inquiries (RCOIs) to all suppliers of their affected parts.

Using a standard CMRT form, this RCOI data collection step requires companies to contact suppliers throughout their supply chain all the way down to the Smelters or Refiners (SORs) themselves.

GreenSoft provides CMRT data gathering, validation and review for your RCOI data collection step, and additionally GreenSoft can perform SOR Validation so you can show your due diligence.

GreenSoft Has the Solution for EU RoHS Compliance

The key to RoHS compliance is having complete, accurate, and current data on all components within your affected products.

We'll provide 100% coverage on data collection for compliance regulations so that you can show due diligence while still focusing on your core competencies.

We validate your data for completeness and accuracy using our stringent quality system that combines automated checks and manual review to ensure data quality of 99.9%.

We cut down on data collection time by using our extensive GreenSoft Component Database containing continually updated parts data.

We deliver the component compliance data to you in any format you need including Excel, IPC-1752, IPC-1752A and IEC 62474 formats.

A Roadmap for EU REACH Compliance

GreenSoft helps electrical and electronics manufacturers manage REACH compliance with:

- ⊘ **REACH Data Collection**
  Collect REACH SVHC/Annex-14/Annex-17 statements and full-disclosure chemical data for your components.

- ⊘ **REACH Data Validation**
  GreenSoft conducts extensive data validation procedures including manufacturer names and part numbers, CAS numbers against chemical names, component weight versus aggregated chemical weight, and many others.

- ⊘ **Replacement Parts**
  GreenSoft will help identify non-compliant parts and help find compliant replacements for non-compliant components.

Award-Winning GreenData Manager® Software

If you've already established a system for collecting parts data from suppliers, you'll still need a system for storing and reporting on that information. GreenData Manager® software is a powerful tool to help you manage compliance data and reporting.

Designed just for environmental compliance, GreenData Manager® software features:

- ⊘ Central storage location for all your component and BOM substance data and documents, compliance reports and regulation requirements
- ⊘ Sorting, filtering, and reporting abilities at the BOM-level, product-level, and company-level
- ⊘ Easy integration into your existing workflow with PLM or ERP system

- ⊘ Secure protection of your BOM-level data
- ⊘ Parameters for over 24 regulations built-into the software
- ⊘ Ability for users to write their own custom rules for requirements or regulations unique to your company
- ⊘ Updates to regulation parameters when regulations change

With packages ranging from single-user platforms installed behind your company's own firewall to multi-user platforms accessible from anywhere in the world via the Internet on a secure cloud, this flexible software tool is perfect for companies of all sizes.
